DOOR

Company Introduction

Kangton Industry, Inc. is a superior supplier of door in China. Since 2004, we've been sharing good markets worldwide. Our strengths are commercial wooden door, laminate door and wood veneer door. We provide one stop door solution to clients, including interior, exterior, and the fire rated door.

With CE, Intertek, SGS, and FSC certificates, our doors are successfully accepted by big brand, real estate, developer and wholesale company all over the world. You can find our doors in different projects in North America, Europe, Australia, Southeast Asia, South America, Mid-East and Africa.

Kangton select our strategic partners with international quality standard. We strictly control the quality and provide inspection during production and before loading. All our clients will receive QC report with detailed photos of each shipment. We are responsible for powerful competitive price, top quality and developing new product. Our experienced consultant team will ensure our clients completely be leadership in the market.

One Stop DDP service is available, includes shipping, tax, duty, to door charges. Our aim is to create extra value to our clients and develop together.

Whatever you need for doors, we believe you can find the best in Kangton.

KDW04

WPC stands for Wood Plastic Composite. WPC doors have a unique combination of wood fiber, bamboo powder, and thermoplastic resins. It is a relatively new green material that offers the benefits and advantages of both wood and plastic. WPC provides an innovative technology that is far better than traditional wood.

CONFIGURATIONS

DOUBLE SWING

This is the most common and popular entryway configuration, consisting of two door slabs, matching jambs and casings, extensions (if necessary), hinges, a lock, and a handle (single- or double-sided). Double magnetic catches are used in closet openings to keep the shutters closed. In inter-room doorways, one slab is usually fixed with a flush bolt, while the other is the active slab. An astragal is used to seal a small gap between the two shutters, a vertical molding attached to one or both swinging doors against which the other door seals when closed.

DOUBLE POCKET

A bi-fold door is a type of door that opens by sliding the panels and folding them up. It optimizes floor space since it requires half the amount of room needed by swinging ones. Additionally, it provides an opportunity to create an unusual interior design. Bi-fold door units are commonly used in closets.

BIFOLD SYSTEM

A bi-fold door is a type of door that opens by sliding the panels and folding them up. It optimizes floor space since it requires half the amount of room needed by swinging ones. Additionally, it provides an opportunity to create an unusual interior design. Bi-fold door units are commonly used in closets.

BYPASS SYSTEM

A bypass door is a sliding one that opens horizontally by having one door slide in front of the other parallel to a wall. It's a popular choice for closet openings and can be used instead of bi-fold systems. Our bypass entry units have high-quality tracks and modern flush pulls.

BARN SYSTEM

The Barn System is a contemporary alternative to traditional swinging doors. It allows for an entrance to slide along a wall on exceptional guides, utilizing roller systems and a rail mechanism with a stopper intended for hinged single-door panels situated in the design's top part. This system does not use a threshold, allowing for a whole door opening that gives the impression of complete space. It is practical and convenient for disabled individuals or for cleaning the room.

INVISIBLE SYSTEM

The Barn System is a contemporary alternative to traditional swinging doors. It allows for an entrance to slide along a wall on exceptional guides, utilizing roller systems and a rail mechanism with a stopper intended for hinged single-door panels situated in the design's top part. This system does not use a threshold, allowing for a whole door opening that gives the impression of complete space. It is practical and convenient for disabled individuals or for cleaning the room.

ACCESSORIES
