Company Introduction

Kangton Industry, Inc. is a superior supplier of flooring in China. Since 2004, we've been sharing good markets worldwide. Our strengths are commercial vinyl, engineered, hardwood, laminate flooring and WPC decking.

With Floorscore, Greenguard, CE, SGS, Intertek, DIBT and FSC certificates, our flooring are successfully accepted by big brand, real estate, developer and wholesale company all over the world. You can find our flooring in different projects in North America, Europe, Australia, Southeast Asia, South America, Mid-East and Africa.

Kangton select our strategic partners with international quality standard. We strictly control the quality and provide inspection during production and before loading. All our clients will receive QC report with detailed photos of each shipment. We are responsible for powerful competitive price, top quality and developing new product. Our experienced consultant team will ensure our clients completely be leadership in the market.

One Stop DDP service is available, includes shipping, tax, duty, to door charges. Our aim is to create extra value to our clients and develop together.

Whatever you need for flooring, we believe you can find the best in Kangton.

2004

Since

Commercial Hardwood Flooring

Engineered hardwood flooring is real wood flooring, it is more stable than solid wood. Engineered wood flooring is less-susceptible to shrinking and expanding with changes in temperatures and humidity while the multiple wood layers in engineered hardwood make it very durable.

Treatment: Brushed / Smooth / Handscraped / Glazed **Click system:** Tongue & Groove / Välinge patent click system

Grade: Prime / Select / Character / Rustic

- German Homag slotting machine
- E1 WBP marine plywood base core, birch backing
- Fit for heat system
- Micro V-belvel in 4 sides, TG
- Treffert UV oiled, Brushed

Plank Styles

Plank Grading

Prime (AB Grade)

Has very little, if any knots. There will be a minimal amount of colour and grain variation. Only 5% of a 100-year-old Oak tree can produce prime grade, hence why it is the most expensive grade, being scarcely available.

Select (ABC Grade)

A mix of prime and slightly knotty boards. Some colour and grain variation can be expected, and there will be minimal sapwood and filler.

Character (ABCD Grade)

The most common grade. Includes both heartwood, sapwood, colour and grain variation. Allows for a range of both knotty and select boards.

Rustic (CDE Grade)

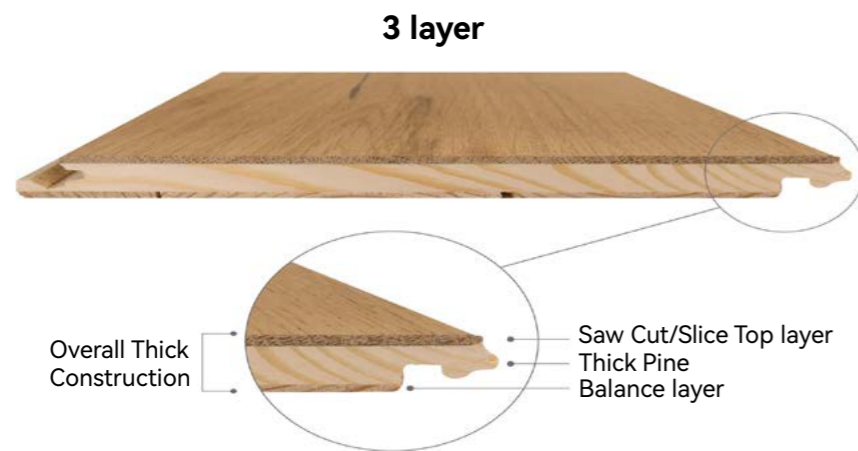

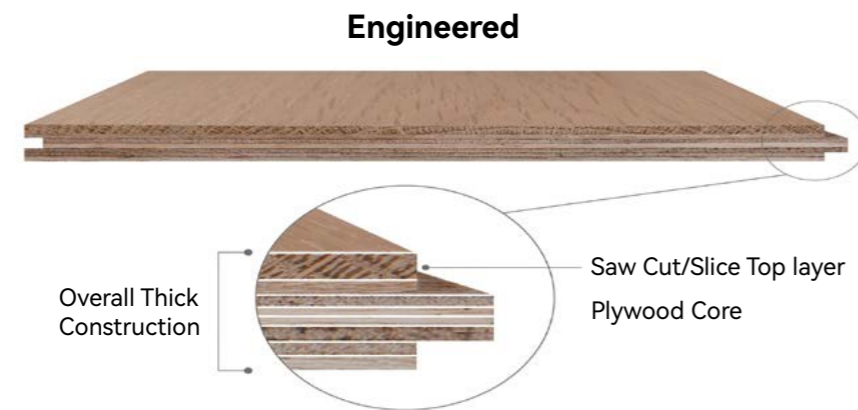

Allows limitless size and number of knots. You can expect colour and grain variation, heartwood and sapwood.

Specification and Structure

Construction	Engineered
Species	European Oak / White Oak / Hickory / Walnut / Acacia
Design	Plank / Herringbone / Chevron /Parquet
Veneer	Sliced / Sawn
Backing	E1 Birch wood
Finish	Brushed / Medium Smoked /Treffert UV Oiled
Profile	Tongue & Groove (Click available)
Edges	Micro bevel on all 4 sides (GO4)
Veneer Grade	Prime / Select / Character /Rustic

Hardwood Flooring

Wood Veneer SPC (VSPC)

WSPC Flooring / SPC Wood veneer flooring is a innovation new SPC flooring. The structure is multiple of uv coating Wood veneer and SPC rigid core formed by cold pressing.Making the product extremely stable and water resistant.

Specification	
Material	Real Wood +100% virgin material
Thickness	7-9.5mm
Size	1220*183mm
Top wear layer	0.6mm/ 1.2mm
warranty	15-20 years for residential , 10years for light commercial
Color	Various colors and wood types
Installation	Click system
Surface treatment	UV coating
Special treatment	Embossed or Smooth
Design style	wood grain

The Thickest Veneer SPC Flooring

- The Thickest Veneer SPC Flooring
- 14mm Thickness
- Natural Grain
- Easy Installation
- No Need Of Wood Joist
- Eco-Friendly
- Anti-Slip
- Water Resistant

Commercial Vinyl Flooring

Vinyl Flooring has become more popular because modern versions of vinyl do a much better job of looking like real hard-wood and tile at budget-friendly prices. It can therefore be ideal for a kitchen, bathroom, or any other area prone to spills and a lot of foot traffic

ABA Rigid SPC Flooring

ABA core is much more stable dimensionally in terms of performance and provides better underfoot feels. The best thing about the ABA structure is that it keeps the rigid character of SPC and adds the soft touch of PVC vinyl flooring.

ABA SPC rigid core flooring is suitable for families with old people, children and pregnant women. Flexible elasticity technology can reduce impact and effectively protect family health. It is mainly used in shopping malls, hotels, nursing homes, schools, hospitals, gyms and other places.

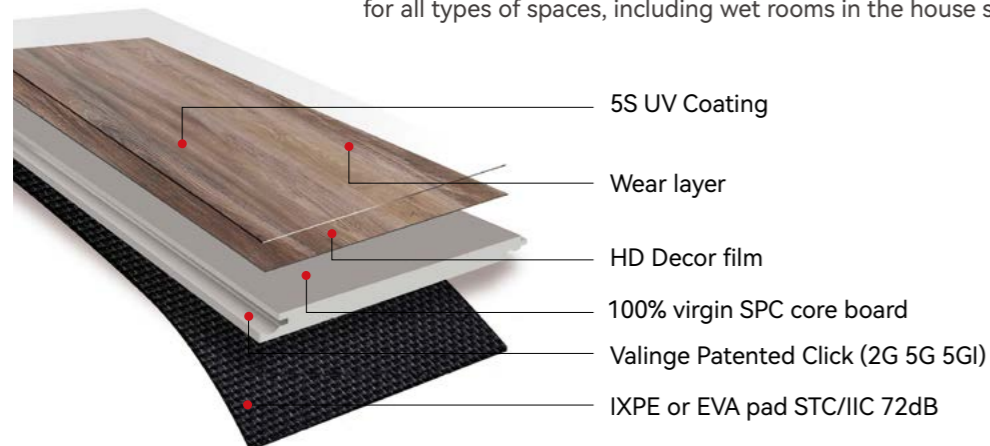

SPC Flooring

SPC vinyl flooring is one of the best alternatives for floors with high foot traffic, such as hotels or offices, although it is also used in the domestic environment.

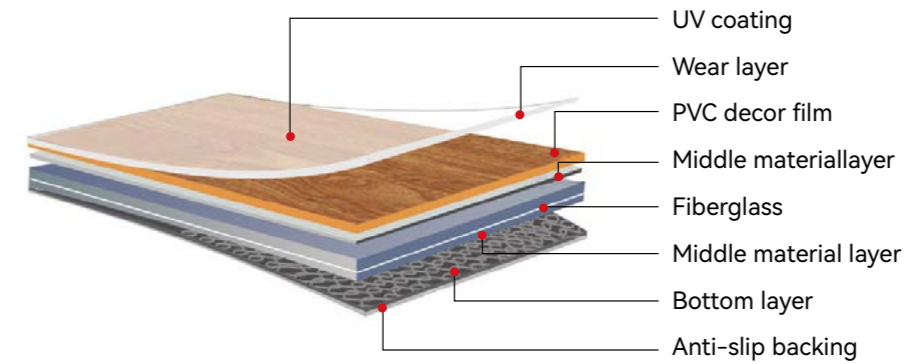

It is more rigid than that of traditional vinyl because its core is made of limestone and stabilizers.

SPC flooring is considered the “next generation” in vinyl flooring. In addition, unlike wood and laminate floors, they are 100% water resistant, being much more versatile and suitable for all types of spaces, including wet rooms in the house such as bathrooms and kitchens.

Loose lay flooring

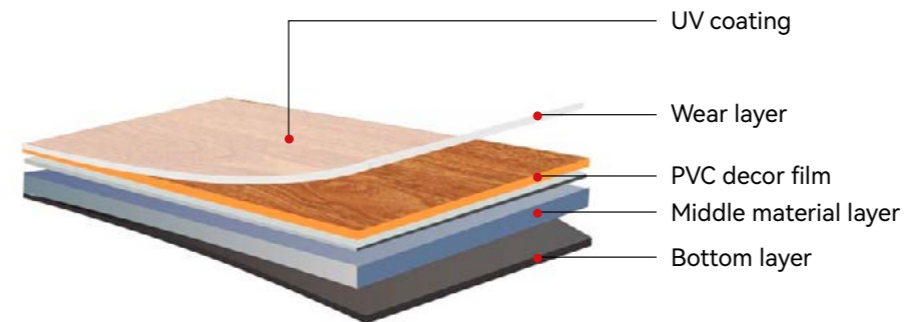

Loose lay vinyl is the ultimate in D.I.Y flooring - no power tools required, just a sharp Stanley knife! Every plank has a unique anti-slip backing. The floor is installed wall to wall in a matter of minutes, not hours, with the only "hard" work involved cutting to size the last plank on each row.

Dry back LVT

Dry back (Glue down) LVT is installed by sticking them directly to your subfloor. We have a range to choose from, including tiled effect and wood effect stick down LVT.

It is highly durable yet affordable. Its robust build affords premium protection against scratches, scuffs and stains.

Waterproof Laminate Flooring

Kangton Waterproof laminate flooring guarantees 100% resistance to water which allows wet mopping and steam mopping if the sealer isn't damaged. The easy-cleaning technology has enhanced stain and soil protection to ensure easy cleanup for daily incidents.

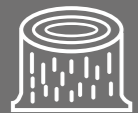

PVC Features

- PVC free
- Plastic free
- Phthalates free

- Degradable
- Recyclable
- Sustainable

- High thermal insulation power
- Excellent noise absorption
- Prevent rapid combustion to slow the spread of fire

Co-extrusion WPC Decking

Co-extrusion WPC is the upgrade version of traditional WPC, with the traditional WPC as the core layer, outside the 360 degree covered with a protective layer. The core layer and the protective layer are molded by extrusion at the same time.

- Ultra-low maintenance
- Longevity and durability
- Scratch and stain resistant

Elegance Color Choice

Traditional WPC Decking

WPC decking is stylish, versatile and easy to install. Whether you have a deck, entertaining platform or pool and spa area. KANGTON WPC adds definite style and sophistication which is long wearing, safe and ecofriendly. Our decking is safe for Children as it is splinter free.

WPC / SPC Molding (Hardwood & HDF Molding available)

Kangton Moldings are flame resistant, waterproof and easily installed. Furthermore, the pattern can be same as flooring which can perfectly match with your flooring, no matter MDF or solid flooring Kangton Moldings are the best mates when you purchased our flooring

Underlayment

Foam is used as underlayment before installing flooring with the aim to disperse friction, insulate noise, and prevent moisture and heat. It is characterized with high flexibility, lightweight and high durability. Besides, it can be recycled and environmentally friendly.
